ISO/IEC 27001 Information Security Management

ISO/IEC 27001:2013 specifies the requirements for establishing, implementing, maintaining and continually improving an information security management system within the context of the organization. It also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization.

The requirements set out in ISO/IEC 27001:2013 are generic and are intended to be applicable to all organizations, regardless of type, size or nature.

Economic intelligence to make more intelligent

SCB Economic Intelligence Center

The screenshot displays the SCB EIC website interface. At the top, the SCB EIC logo is on the left, and navigation links for 'Macroeconomics', 'Industries', and 'COVID-19' are on the right. The main content area features a grid of eight article cards. Each card includes a featured image, a title, a date, and a category label (e.g., FLASH, NOTE, DRAFT). A 'Pinned to...' menu is overlaid on the right side of the grid, showing a list of categories with checkboxes: Home (checked), Macroeconomics (unchecked), Industries (checked), COVID-19 (unchecked), US-China Trade War (unchecked), and The Best of 2020 (unchecked). A '+ Create new theme' button is located at the bottom of the menu.
